LETTER

The undersigned, principal agent identified in the file of this patent, submitted a Petition for Certificate of Correction under 37CFR1.322 Office Mistake on October 4, 1985. That petition has not yet been acted upon and in fact has been placed in the patented file. It is believed that this is an oversight on the part of the Office which occurred in the course of considering another Petition for Certificate of Correction filed at the same time. The latter involved a change of inventorship and was issued on March 18, 1985.

Prompt remedy of the above oversight is requested. Bristol-Myers Company, assignee of the above patent, has invested substantial sums of money in development of the claimed invention over the last ten years, and has reason to believe that marketing approval by the Federal Food and Drug Administration will be received soon. An application for extension of the term of the patent under 35 USC 156 has been prepared and will be filed promptly following approval the New Drug Application. Copies of Certificates of Correction must be included in such application in accordance with Guidelines Section D(b)(7), and accordingly it is imperative that action on the pending Petition be

completed hastily so as to avoid delaying filing of the application for extention of term.

The Examiner's prompt cooperation in acting upon the Petition will be greatly appreciated. A copy of the Petition for Correction is enclosed for the Examiner's convenience, with a copy of the post card receipt.

Respectfully submitted,
